Early recognition of Malignant Melanoma is becoming increasingly important in Dermatology. In Germany the annual increase in reported new cases is between 5 and 10%. In parts of the world with a fair-skinned population the incidence has almost doubled in the last 15 years. Early recognition and diagnosis is the key to improved healing rates. HEINE Optotechnik’s long experience as market leader in Dermatoscopy has enabled us to set a new standard for image quality with the DELTA 20 Dermatoscope.

HEINE DELTA 20® Dermatoscope

Dermatoscope with LED illumination

For dermatoscopic examination of pigmented skin lesions and early diagnosis of malignant melanoma. Dermatoscopy oil is applied to the skin to make the outer skin layers more transparent. The DELTA 20 makes structure changes visible. The differential diagnosis of initial malignant melanoma and other pathologies is made easier and more accurate with DELTA 20.

- High-resolution optics with achromatic lenses system. 10x magnification, distortion-free edge-to-edge, very large, highly-detailed image.
- LED illumination close to daylight. 6 LEDs or, alternatively, lateral illumination from 3 LEDs for improved contrast, virtually unlimited working life.
- Adjustable Eyepiece. Individual focusing, range of correction -6 to +6 dpt.
- Detailed compendium with photographic atlas included. Simplifies the differential diagnosis of pigmented lesions.
- Digital photography with the dermatoscope when combined with an adaptor for a digital SLR camera.

(For more information, see the DELTA 20 LED Dermatoscope Brochure).

</table>

Please note: BETA 3.5V rechargeable handles can be supplied with a Lithium battery (X-007.99.381) with increased capacity and no memory effect at extra cost. To order HEINE sets with 3.5V BETA handle with Li-ion battery technology, use the number “27” in the voltage designation, e.g. K-256.27.420 for DELTA 20 Dermatoscope Set with BETA NT handle and charger.

For information on HEINE battery and rechargeable handles, see pages 115–119.
HEINE alpha+® Dermatoscope

A Dermatoscope in compact form

High-quality instrument in compact form with 10x magnification. Adjustable focus. Threaded connector. Available with 3.5 V XHL Xenon Halogen Technology for super bright illumination.

- 10x magnification. Large, high-resolution image.
- Solid metal construction. Durable and tough.
- XHL Xenon Halogen Technology.

HEINE mini 3000® Dermatoscope

A Dermatoscope in a handy pocket format

Modern pocket dermatoscope in a compact design with high-quality optics. 10x magnification with focusing optics. Metal threaded connector. Can only be used with the mini 3000 handle system.

- 10x magnification. Large, high-resolution image.
- Solid metal construction. Durable and tough.
- Enhanced XHL Xenon Halogen Technology for more light. Very bright, concentrated white light for perfect illumination.
- Attachment clip with integrated on/off switch. Secure. Switches off automatically when returned to the pocket.
- Detailed compendium with photographic atlas included. Simplifies the differential diagnosis of pigmented lesions.
- 2-piece handle and head. Easy to maintain, flexible.
- High-quality handle: Chrome-finish upper section/refined plastic. Shockproof, sturdy, non-slip.
- Replaceable batteries. Size AA.

Accessories
for the DELTA 20 Dermatoscope

- Contact plate, 23 mm dia. without scale: K-000.34.203
- Contact plate, 23 mm dia. with scale: K-000.34.204
- Small contact plate, 8 mm dia. for the examination of inaccessible lesions: K-000.34.205

- Dermatoscopy oil (pack of 6 x 10 ml) is applied to the external skin layers, making them transparent: K-000.34.005

- SLR Photo adaptor for Dermatoscope/Digital SLR Camera, with Optics. Wide Field of View, Crisp Image.
  - SLR Photo adaptor for Canon: K-000.34.185
  - same, for Nikon: K-000.34.186
  - same, for Olympus: K-000.34.187

- Adaptor cord (1.3 m) for instrument/handle: X-000.99.231

- BETA Belt Clip for BETA handle: X-000.99.008

- Photo Accessory Set (not shown) includes SLR Photoadaptor, Adaptor cord and BETA Belt Clip.
  - Photo Accessory Set for Canon: K-000.34.190
  - same, for Nikon: K-000.34.191
  - same, for Olympus: K-000.34.192

Accessories
for alpha+ and mini 3000 Dermatoscope

- Contact plate without scale for alpha+ (colour: blue): D-000.84.105
  - same, for mini3000: D-000.78.116

- Contact plate with scale for alpha+ (colour: blue): D-000.84.106
  - same, for mini3000: D-000.78.117

- Small contact plate, 8 mm dia. for the examination of inaccessible lesions: K-000.34.008

- Dermatoscopy oil (pack of 6 x 10 ml) is applied to the external skin layers, making them transparent: K-000.34.005

For information on HEINE battery and rechargeable handles, see pages 115–119.
